thank you

GREENIDGE GENERATION!

We want to publicly thank all the employees of this great organization for their business during the past year.

Partnering with the team at Greenidge, O'Connell Electric was able to keep our full team of local IBEW Union electricians employed during the COVID-19 pandemic to support power upgrades and construction of a brand new, state-of-the-art data center.

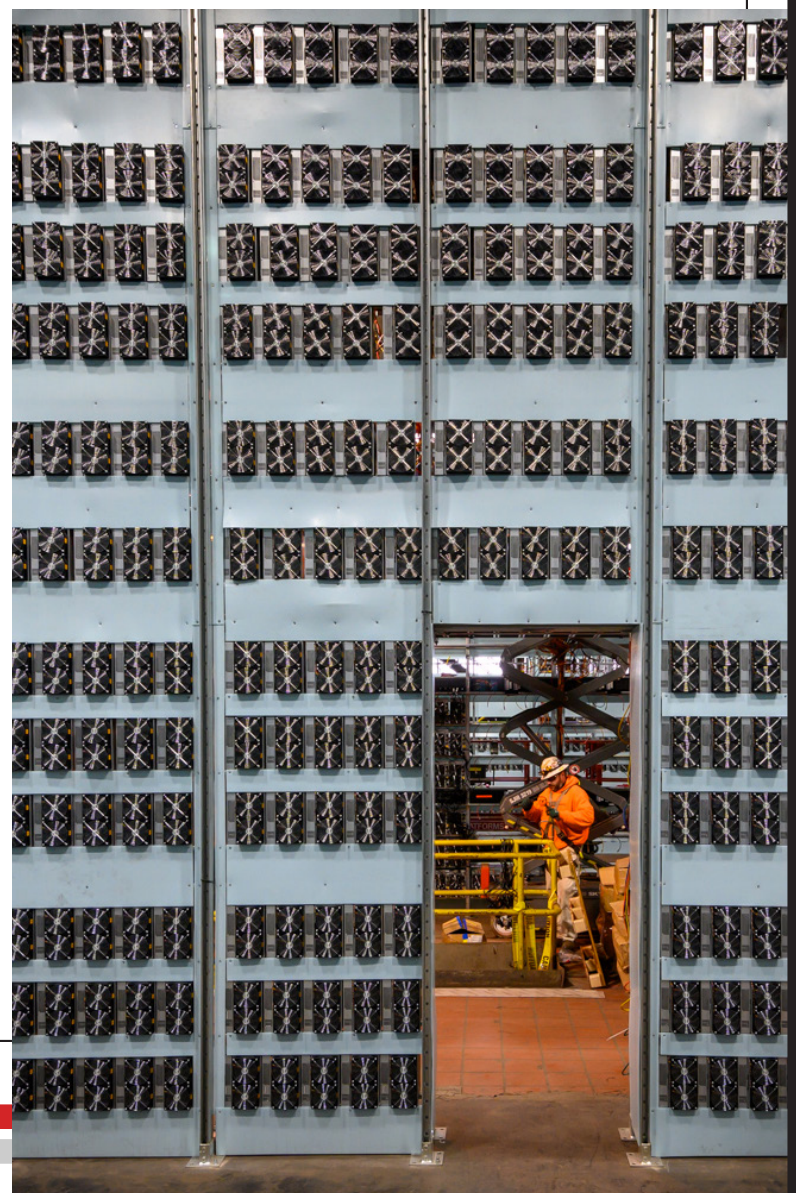

O'Connell is well known across the country for our highly-skilled trades men and women. In fact, we're one of the largest electrical contractors in the nation, and we're proud to say we are a locally-based NY State contractor supporting families in our communities.

When Greenidge decided to embark on the creation of its exciting new data center, they realized O'Connell's electricians would be critical in supporting this project.

Installing this new technology in the heart of the Finger Lakes made global headlines, gaining significant press for our beloved wine and tourism region.

We applaud the team at Greenidge Generation and their efforts to stimulate economic development in our region. This initiative is an ideal, behind-the-meter complement to providing critically-needed electricity for 20,000 homes and businesses. Greenidge has done an amazing job adapting new, clean technology at its facility and creating this project to process transactions on the global bitcoin network.

As we look ahead, we are fortunate to have strong partnerships with our local customers such as Greenidge Generation. We are thrilled to continue working by their side to set the stage for Upstate New York to become a sought-after location for data centers, emerging technology and bitcoin mining operations.
